OUR SERVICE

All the production procedures are under strict quality control. From the designing, color adjusting, raw material cutting, color printing, glass cutting, edge-beveling, firing, assembling, to the packing, we do the 100% inspection and spot check before shipment. Besides, we guarantee our products quality with the international certificates, e.g.: SGS, TUV, BV, and CE.

Crystal Glass Mosaic

- Crystal glass mosaic, made of natural minerals and glass powder, is the safest building material.
- Features: soft tone, simple, chemical stability, good thermal and cold stability, nodiscoloration, no dust accumulation, light volume weight, firm adhesion.
- It's transparent and shining, like jadeite. The lighting effect is more prominent in the sun, adding extraordinary mysterious color and infinite romantic sentiment to the pool in the night.

Gold Line Glass Mosaic

- Gold line glass mosaic, containing a certain proportion of filiform or point ribbon metal crystal particles, flickering in light.
- Features: good chemical stability, hot and cold stability, no discoloration, no dust accumulation, light volume weight and firm adhesion.
- It is more texture and high-grade than the general melting mosaic, and the metal crystal particles are evenly distributed and natural, in the form of dotted silk and golden yellow.

Starry Sky Series

- Starry sky mosaic, containing irregular distribution of white crystal particles, is as bright as the starry sky. The surface will changes with light.
- Features: good chemical stability, hot and cold stability, no discoloration, no dust accumulation, light volume weight and firm adhesion.
- The surface texture is the same as the luminous effect of pearl, and different light angles will have different light shadow and luminous effect.
